BUILDING THE AB G12 WING CHASSIS

Developed for G12 wing racing on flat and banked tracks, the AB chassis is totally versatile. For running on flat or semi flat tracks, leave the weight in the weight plates. For racing on banked tracks remove or trim the weight plates.

There are two optional rear pin tube mounts to allow you to fit a floating rear tube either with the pin tube collets on the inside or outside of the brackets, or to select your choice of body float. You also have the choice of running an integral guide plate, or trimming this away and fitting the separate guide plate, depending on the rules you race to.
